

ATANG MAHLOMAHOLO

An economist and data specialist with over five years of experience in central banking and multilateral institutions, specialising in monetary policy frameworks, operational processes, and data-driven decision-making. Adept at designing and implementing automation, data pipelines and workflows, automating reporting workflows, and developing forecasting tools to enhance policy analysis and operational effectiveness. Proficient in **R**, **Python**, **SQL**, and reporting tools such as Rmarkdown, Quarto, Shiny, and Microsoft Office Suite, with a proven track record in creating interactive dashboards and actionable insights for diverse stakeholders. Experienced in monitoring compliance, analysing quality assurance data, and contributing to knowledge management initiatives within high-impact, multicultural environments.

EXPERIENCE

current
|
2024

Senior Economist

Central Bank of Lesotho

📍 Maseru, Lesotho

- **Monetary Policy:** Advise the Monetary Policy Committee and its sub-committees on reserve adequacy and liquidity developments, ensuring international reserves remain sufficient to defend the Loti-Rand currency peg
- **Liquidity Forecasting and Management:** design, implement, and maintain liquidity forecasting frameworks to guide Open Market Operations (OMO), including treasury bills issuance.
- **Operational Modelling:** Develop and automate high frequency statistical models that forecast the banking system's liquidity using **R** and **Python**.
- **Reporting and Communication:** Prepare concise and technical reports on liquidity and international reserves developments and outlook for Monetary Policy subcommittee.
- **Automation and Efficiency Improvements:** Lead the development end-to-end ETL pipelines that integrate data from flat files and API endpoints to internal SQL databases, streamlining reporting and analysis processes with Department of Research
- **Secretariat Role:** Serve as secretariat to both the MPC and its subcommittee, preparing meeting documentation, technical reports, and formal records of proceedings.

2024
|
2019

Economist

Central Bank of Lesotho

📍 Maseru, Lesotho

- **Liquidity Forecasting and Management:** Used liquidity forecasting framework to forecast liquidity conditions for optimal Open Market Operations.
- **Macroeconomic Forecasting:** Actively participated in forecasting exercises to produce medium-term macroeconomic forecasts for Lesotho.
- **Automated Reporting System Development:** Developed an **R**-based reporting system using Quarto and Markdown for monetary policy technical reports. The system has been adopted for other reports within the Department of Research.
-
- **Secretariat Role:** Serve as secretariat to both the MPC subcommittee, preparing meeting documentation, technical reports, formal records of proceedings, and ensuring follow-up on committee decisions.

LANGUAGE SKILLS

Last updated on July 2025.

2019

Economic Consultant

The World Bank

Maseru, Lesotho

- **Data Collection and Analysis:** Collected, cleaned, and conducted preliminary analysis of high-frequency macroeconomic data sourced from government ministries, data agencies, and other data custodians in Lesotho.
- **Stakeholder Engagement:** Established and maintained working relationships with major economic institutions, data agencies, and relevant stakeholders, facilitating collaborative efforts and data sharing for the World Bank office in Lesotho.
- **Reporting:** Compiled and disseminated periodic economic reports (weekly and monthly) for the Macro Team, focusing on key economic indicators and developments in Lesotho.
- **Technical Support for Communications:** Assisted the Communications team with technical insights and analysis on economic matters, ensuring accurate and effective reporting for the country office.

PROJECTS

current
|
2025

Technical Lead - ETL Pipeline

Central Bank of Lesotho

Maseru, Lesotho

- Developing modular ETL pipelines in **Python** to ingest and normalise economic data from Excel files and API endpoints used across divisions and sections of the Department of Research into a **PostgreSQL** database.
- Designed and implemented a three-tier data architecture (bronze, silver, gold) to ensure data provenance, integrity, and readiness for analysis
- Established metadata standards and validation checks to support reproducible workflows and align with long-term data governance goals
- This work serves as a foundational system for future integration with the Enterprise Data Warehouse.
- Codebase maintained in a private **GitHub** repository, following best practices in version control, modular design, and documentation.

Econ Data APIs

Personal Project

📍 Remote

- Overview: This repository provides a programmatic interface to access multiple economic data sources. It is designed with both **R** and **Python**, ensuring broad applicability for data analysis and research in economics.
- Features:
 - Custom functions to easily access and retrieve economic data without relying on external libraries, which can become obsolete if not maintained
 - Support for both **R** and **Python**, offering flexibility in tool choice for users.
 - Focus on creating user-written functions to ensure long-term reliability and avoid dependency on third-party packages.
- GitHub Repository: Econ Data APIs¹
